SUPPLEMENT TO
REPORT NO.

25X1X

1. Attached for your information are one map of the Prague-Karlin area and three photostatic copies of plans for a tunnel under construction in Prague between Thamova ulice in Karlin and Zizkova nam in Zizkov. About 160 meters of the tunnel were to be completed during 1950. In November 1950 the concrete pavement was laid in this section. It is capable of carrying a load of 500 kg per square meter. Ing. Parik is in charge of the construction work. Although the memo attached to these plans referred to a "railroad tunnel", it is believed extremely doubtful that the tunnel is intended for a railroad line.
